

**AFRISAM DONATES COMPUTER LABORATORIES TO TWO SCHOOLS IN
VERULAM**

Saturday, 13 August 2011 - In its effort to continue building for a sustainable future, building and construction materials company, AfriSam, has sponsored two state of the art computer labs for Everest Heights Primary School and Redcliffe Primary School in Verulam, North of Durban. This is in response to the need to support Verulam's community project of developing its local economy.

Together with the Department Of Mineral Resources, AfriSam handed over the two computer labs at a prestigious community event attended by the Minister of Mineral Resources, Susan Shabangu.

"Community development is at the forefront of our corporate social responsibility initiatives. Our main objective is to give communities a platform that will enable them to be self-reliant and in turn allow them to continue to empower those that may need their assistance in the future," explains AfriSam Corporate Social Responsibility Manager, Tsholo Diale.

"AfriSam's investment in schools is a way of equipping learners and educators with the necessary technological skills and resources that will go a long way in contributing towards economic development within the community," concluded Diale. Afrisam has spent R600 000 for the computer labs project. ENDS ... AUGUST 2011
