

We move the earth

COMPANY	SA EARTHWORKS – A subsidiary of African Access Holdings (Pty) Ltd
SEGMENT	TERTIARY
INDUSTRY CLASSIFICATION	CYCLICAL SERVICES/ SUPPORT SERVICES/ BUSINESS SUPPORT SERVICES

SA Earthworks in partnership with African Access is a full service earthworks company that specialises in bulk earthworks, demolitions, quarrying, site establishment and mining projects. Over 30 years of combined learning experience and best practice are behind SA Earthworks – an efficient, innovative and above all effective company with a diversified range of skills, multiple supply sources, flexible transport options and superb well maintained equipment.

In October 2007, the company welcomed the partnership with African Access Holdings, who with its successful business track record, introduced measurable and sustainable value to SA Earthworks. Recently through the newly established Planet Capital, the two companies entered into the field of alternative energy. Namely, energy generated solely from household waste as well as through the production of biodiesel.

CAPABILITIES & SCOPE OF SERVICES

SA Earthworks specialises in the following fields of civil engineering and mining activities:

Bulk earthworks

With the current fleet of equipment and machinery, the company is capable of executing large volumes of excavation and backfilling of the construction of building platforms, i.e. shopping centres, warehouses, residential estates and sports fields, etc.

Civil services and concrete work

The company's experience in this field ranges from the construction of roads,

railway lines, storm water, to sewer and water networks.

Quarrying and mining projects

As indicated in the selected projects, SA Earthworks involvement in this field is of a highly skilled and professional level. The company has been involved with loading and hauling of the two major aggregate companies in South Africa, namely PPC and AFRISAM, for the past five years and has built a reputation of superb, well-maintained equipment and a professional level of executing the needs of its clients. ■

BULK EARTHWORKS

PROJECT DESCRIPTION	SAB The construction of warehouse platform and civil services. Construction consists of a cut-to-fill operation with associated road works and storm water reticulation
